# PUBLIC HEALTH REPORTS.

## UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

### *Hook-worm disease in the South—Frequency of infection by the parasite (uncinaria americana) in rural districts.*

[Preliminary report by Dr. Ch. Wardell Stiles, Chief of Division of Zoology, United States Public Health and Marine-Hospital Service, detailed for this investigation.]

KERSHAW, S. C., October 22, 1902.

SIR: Through the director of the hygienic laboratory, I have the honor to submit a brief preliminary report in regard to the frequency and geographic distribution of hook-worm disease (uncinariasis) in the Southern States.

Meeting the disease in the Virgilina copper-mine district of southern Virginia and northern North Carolina, I have thus far traced it through the coal-mine district of Cumnock, N. C., the brickyards of Camden, S. C., and the granite-sand district of Lancaster and Kershaw counties, S. C.

The present indications are that it is more prevalent in sandy regions than in clay or stone districts. On the farms and plantations of the sand region of the 2 counties just mentioned, it appears to be the most common disease of man, and from an economic point of view it appears to be of great importance. The extreme cases seem to occur more commonly among children and women than among adult males over 25, but the present facts at my disposal do not indicate that the malady is quite so fatal as the European form of the disease caused by *uncinaria duodenalis*. All of the cases thus far examined are due to *uncinaria americana*, demonstrating clearly that this is an endemic infection and totally independent of the cases which have been introduced from Europe, Asia, and northern Africa.

In general, it may be said that the "pale skin," the "heart disease," the "diarrhea," the "bloat," and the suppression of menses, which I have thus far examined, all represented various stages of heavy infections with *uncinaria americana*, and it is impossible to escape the conclusion that so far as the farms and plantations are concerned, a radical change in the general therapeutics practiced in the localities in question is urgently indicated.

As for the economic side of the problem, it should be recalled that the disease in question is resulting in loss in wages, loss in productiveness of the farms, loss in the school attendance of the children, extra expenses for drugs and for physicians' services, etc.

The heavy and frequent infections found are amply explained by the almost total absence of privies and closets on the farms visited. Defecation occurs at almost any place within a radius of 50 meters from the

house or hut, and as a result the premises become heavily infested with the embryos.

The disease as thus far traced is primarily a "poor man's" malady, and in frequency it far exceeds even the most extreme limit which theoretical deductions seemed to justify before commencing the field work. There is, in fact, not the slightest room for doubt that uncinariasis is one of the most important and most common diseases of this part of the South, especially on farms and plantations in sandy districts, and indications are not entirely lacking that much of the trouble popularly attributed to "dirteating," "resin-chewing," and even some of the proverbial laziness of the poorer classes of the white population are in reality various manifestations of uncinariasis.

The infection among the miners, so far as discovered, is less severe and less common than the infection on the farms and plantations of the sandy districts.

Respectfully,

CH. WARDELL STILES, PH. D.,  
Chief of Division of Zoology.

*Smallpox on steamship City of Cleveland and the Mary E. Perew at Detroit, Mich.*

DETROIT, MICH., October 15, 1902.

SIR: I have the honor to report that Charles E. Bostwick, an attendant in this hospital, Cyrus C. Carroll, sailor from the steamship *City of Cleveland*, and Louis Carey, sailor from the *Mary E. Perew*, patients in this hospital, were yesterday evening found to be suffering from varioloid and sent to the city smallpox hospital.

They had all been vaccinated, and it is thought the cases will be mild. They were isolated as soon as the eruption appeared, the rooms occupied by them disinfected, and all attendants and patients in the hospital vaccinated or revaccinated. It is believed that Cyrus C. Carroll contracted this disease in Cleveland, and Bostwick and Cary contracted the disease from a patient who was sent from this hospital to the smallpox hospital about two weeks ago.

Respectfully,

H. W. AUSTIN,  
Surgeon.

*Case of smallpox on U. S. snag boat Macomb at Memphis, Tenn.*

MEMPHIS, TENN., October 2, 1902.

SIR: I have the honor to report that on yesterday, acting under your instructions, I visited the U. S. snag boat *Macomb* and found thereon one Jas. Lee, colored, with a well-developed case of variola. Lee shipped at St. Louis on September 23, and was vaccinated on that day for the first time. He had resided in St. Louis since August 18, and had gone there from Cairo, Ill. I had patient transferred from U. S. snag boat *Macomb* to the isolation hospital, inspected officers and crew of 40—passed 36 and vaccinated 4—issued certificates to those vaccinated; have thoroughly disinfected quarters with formaldehyd, and do not fear spread of disease among those remaining on board. Offered a bill of health and same was refused as being unnecessary.

Respectfully,

MARCUS HAASE,  
Temporary Acting Assistant Surgeon.

*Inspection of vessels at Seattle, Wash.*

SEATTLE, WASH., October 6, 1902.

SIR: I have the honor to report that the following vessels were inspected at this station during the month of September, 1902, viz:

For Nome, Alaska, September 16, steamship *Senator*; crew, 85; passengers, 32. September 17, steamship *Centennial*; crew, 54. September 19, steamship *Oregon*; crew, 74; passengers, 4.

From Nome, Alaska, September 18, schooner *Nellie Colman*; crew, 8.

Respectfully,

CHAS. B. FORD,  
*Acting Assistant Surgeon.*

*Arrival at Reedy Island Quarantine of vessels from West Indian ports.*

REEDY ISLAND QUARANTINE,  
*via Port Penn, Del., October 12, 1902.*

SIR: Through the medical officer in command of national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels:

October 6, schooner *Daisy Farlin*, from Havana, with iron; no passengers; bill of health signed by Assistant Surgeon Trotter. October 11, steamship *Tyr*, from Havana, via Cape Haitien, with logwood; no passengers; Havana bill of health signed by Assistant Surgeon Trotter; schooner *Griffin*, from Havana, with iron; no passengers; bill of health signed by Assistant Surgeon Trotter.

Respectfully,

T. F. RICHARDSON,  
*Assistant Surgeon, In Command.*

*Arrival at Baltimore of vessels from Cuban and South American ports.*

BALTIMORE, MD., October 18, 1902.

SIR: I have the honor to report the arrival of the following vessels at this port for the week ended this day: American barkentine *White Wings*, from Rio de Janeiro, with coffee; American schooner *John A. Matheson*, from San Andres, Col., with fruit; British steamship *Lincluden*, from Daiquiri, with ore; British barkentine *Genesta*, from Fray Bentos, Uruguay, with bones, etc.; British steamship *Melbridge*, from Daiquiri, with ore; British steamship *Coya*, from Talcohuano, Chile, with general cargo; British steamship *Miramar*, from Daiquiri, with ore.

Respectfully,

WILLIAM H. STONE, *Collector.*

## REPORTS FROM THE MEXICAN BORDER.

*El Paso, Tex., October 11, 1902—Inspection service.*—I have the honor to submit herewith summary of transactions at this station for the week ended October 11, 1902. Inspection of Mexican Central Railroad passengers, 189; inspection of Rio Grande and Pacific Railroad passengers, 32; inspection of Mexican immigrants, 169; disinfection of soiled linen imported for laundry, 518 pieces; detention of 2 men for two days, having been only eight days from Vera Cruz; disinfected their baggage. Gentleman and wife arrived October 6, 1902, from Orizaba via Vera Cruz. His letter of credit proved that he arrived in the City of Mexico September 26, 1902. Let him pass, but his baggage, consisting of 3 trunks and other articles, such as blankets, etc., were disinfected.

E. ALEXANDER,  
*Acting Assistant Surgeon.*

*Laredo, Tex., October 11, 1902—Inspection service.*—I have the honor to submit the following inspection report for week ended October 11, 1902: Number of passenger trains entering from Mexico inspected, 6; persons on trains entering from Mexico inspected, 230; persons inspected on footbridge who came to Nuevo Laredo, Mexico, from interior of Mexico, 24. October 6, 1 person two days out from Tampico, Mexico, detained and 1 trunk disinfected. October 7, 2 persons two days out from Tampico refused entry until complete period of five days. These persons were brought by railroad to replace striking firemen. October 8, 4 trunks disinfected; they had been six days out from Vera Cruz, Mexico. One person (colored fireman) two days out from Tampico refused entry until complete necessary period. Immigrants inspected, 5. Only 6 trains entered from Mexico during week on account of railroad being tied up by strike of firemen.

H. J. HAMILTON,  
*Acting Assistant Surgeon.*

*Statistical reports of States and cities of the United States—Yearly and monthly.*

CALIFORNIA—*Los Angeles.*—Month of September, 1902. Estimated population, 120,000. Total number of deaths, 148, including diphtheria, 4, and 18 from tuberculosis.

*Oakland.*—Month of September, 1902. Estimated population, 75,000. Total number of deaths, 96, including diphtheria, 5, and 12 from tuberculosis.

CONNECTICUT.—Reports to the State board of health for the month of September, 1902, from 166 towns having a census population of 907,048, show total of 1,166 deaths, including diphtheria, 20; enteric fever, 30; measles, 1; scarlet fever, 2; whooping cough, 16, and 96 from tuberculosis.

ILLINOIS—*Peoria.*—Month of September, 1902. Census population, 56,100. Total number of deaths, 59, including enteric fever, 2, and 3 from tuberculosis.

INDIANA—*Evansville.*—Month of September, 1902. Estimated population, 65,000. Total number of deaths, 64, including enteric fever, 4, and 6 from tuberculosis.

MASSACHUSETTS—*Holyoke.*—Month of September, 1902. Census population, 45,712. Total number of deaths, 63, including diphtheria, 1; enteric fever, 1, and 8 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended October 4, 1902, from 87 observers, indicate that diphtheria was more prevalent and cholera infantum, inflammation of bowels, remittent fever, measles, and smallpox were less prevalent than in the preceding week. Meningitis was reported present at 2, whooping cough at 16, smallpox at 16, measles at 19, diphtheria at 29, scarlet fever at 72, enteric fever at 100, and phthisis pulmonalis at 221 places.

Reports to the State board of health, Lansing, for the week ended October 11, 1902, from 79 observers, indicate that scarlet fever, pleuritis, inflammation of bowels, diphtheria, remittent fever, pneumonia, erysipelas, measles, and smallpox were more prevalent and dysentery was less prevalent than in the preceding week. Meningitis was reported present at 3, whooping cough at 18, smallpox at 20, measles at 21, diphtheria at 34, scarlet fever at 72, enteric fever at 88, and phthisis pulmonalis at 222 places.

*Grand Rapids*.—Month of September, 1902. Estimated population, 90,000. Total number of deaths, 98, including diphtheria, 1; enteric fever, 3; scarlet fever, 1, and 9 from phthisis pulmonalis.

NEBRASKA—*Omaha*.—Month of July, 1902. Census population, 102,555. Total number of deaths, 91, including 8 from tuberculosis.

Month of August, 1902. Total number of deaths, 91, including enteric fever, 1; scarlet fever, 1; whooping cough, 1, and 13 from tuberculosis.

*South Omaha*.—Month of September, 1902. Census population, 26,001. Total number of deaths, 27. No deaths from contagious diseases reported.

NEW HAMPSHIRE—*Concord*.—Month of September 1902. Estimated population, 19,500. Total number of deaths, 38, including enteric fever, 1, and 3 from tuberculosis.

*Franklin*.—Month of September, 1902. Estimated population, 5,843. Total number of deaths, 5. No deaths from contagious diseases.

*Manchester*.—Month of September, 1902. Census population, 56,987. Total number of deaths, 88, including diphtheria, 1; enteric fever, 1, and 6 from phthisis pulmonalis.

NEW YORK—*Auburn*.—Month of September, 1902. Estimated population, 35,000. Total number of deaths, 51, including 2 from phthisis pulmonalis.

PENNSYLVANIA—*Dunmore*.—Month of September, 1902. Estimated population, 15,000. Total number of deaths, 12. No contagious diseases reported.

*Scranton*.—Month of September, 1902. Estimated population, 102,026. Total number of deaths, 110, including diphtheria, 1; enteric fever, 1; whooping cough, 1, and 8 from tuberculosis.

*York*.—Month of September, 1902. Estimated population, 37,000. Total number of deaths, 38, including enteric fever, 3, and 4 from tuberculosis.

TENNESSEE—*Chattanooga*.—Month of September, 1902. Estimated population, 40,000—white, 27,000; colored, 13,000. Total number of deaths, 29—white, 18; colored, 11—including 3 from tuberculosis.

*Knoxville*.—Month of September, 1902. Estimated population, 35,000—white, 26,000; colored, 9,000. Total number of deaths, 54—white, 38; colored, 16—including diphtheria, 2; enteric fever, 1; scarlet fever, 4; whooping cough, 3, and 9 from tuberculosis.

*Nashville*.—Month of September, 1902. Estimated population, 81,320—white, 51,128; colored, 30,192. Total number of deaths, 142—white, 70; colored, 73—including diphtheria, 2; enteric fever, 4; scarlet fever, 1, and 28 from tuberculosis.

UTAH—*Ogden*.—Month of September, 1902. Estimated population, 20,000. Total number of deaths, 27, including diphtheria, 5; enteric fever, 5, and 1 from smallpox.

*Salt Lake City*.—Month of September, 1902. Census population, 53,531. Total number of deaths, 68, including diphtheria, 2; enteric fever, 4, and 2 from tuberculosis.

VIRGINIA—*Richmond*.—Month of August, 1902. Estimated population, 100,000—white, 67,250; colored, 32,750. Total number of deaths, 147—white, 64; colored, 83—including diphtheria, 4; enteric fever, 5; whooping cough, 6, and 16 from tuberculosis.

Month of September, 1902. Total number of deaths, 170—white, 82;

colored, 89—including diphtheria, 10; enteric fever, 6; whooping cough, 4, and 15 from tuberculosis.

WASHINGTON—*Seattle*.—Month of September, 1902. Estimated population, 115,000. Total number of deaths, 79, including enteric fever, 4, and 9 from tuberculosis.

## FOREIGN AND INSULAR.

### ARABIA.

#### *Cholera at Hodeidah—Quarantine imposed at Aden.*

ADEN, ARABIA, *September 17, 1902.*

SIR: I have the honor to report for your information that owing to cholera at Hodeidah, the authorities here have issued a proclamation for eight days' quarantine between Aden and Hodeidah. Copy of letter from Hodeidah is herewith inclosed.

Respectfully,

W. H. LOCKERMAN,  
*United States Vice-Consul.*

The ASSISTANT SECRETARY OF STATE.

[Inclosure.]

HODEIDAH, *September 12, 1902.*

SIR: I have the honor to inform you that the cholera is reported to have broken out here since the day before yesterday, and that the news is officially confirmed since this morning. There are said to be 9 cases of death up till now, all to have occurred in one and the same house in the native quarter of the town. With regard to shipping from here, I have received news from Aden since last night that quarantine will be imposed on all arrivals from Hodeidah.

Respectfully,

PAUL ROST,  
*Acting Consular Agent.*

W. H. LOCKERMAN,  
*United States Vice-Consul, Aden.*

### AUSTRALIA.

#### *Plague in Queensland.*

TOWNSVILLE, QUEENSLAND, *August 21, 1902.*

SIR: I have the honor to confirm my cable of even date as follows: "Plague—ROGERS," and now beg to advise you that the case reported proved fatal. No fresh cases have occurred.

Respectfully,

J. H. ROGERS,  
*United States Consular Agent.*

The ASSISTANT SECRETARY OF STATE.

### BARBADOS.

#### *Dysentery at St. Vincent.*

BARBADOS, WEST INDIES, *September 20, 1902.*

SIR: I have the honor to acknowledge the receipt, at 12.50 p. m. yesterday, of the following cable message from the Department:

Cable extent epidemic dysentery St. Vincent.

As no report or rumor had reached me that any epidemic disease existed at St. Vincent, I immediately sent the following cable message to Mr. Richards, the United States consular agent at St. Vincent:

Cable extent epidemic dysentery if any.

At 11.30 this morning I received by cable the following reply from Mr. Richards :

No dysentery epidemic ; few cases occasionally since eruption ; 3 now reported officially.

At 11.03 this morning I sent by cable to the Secretary of State, Washington, D. C., the following message :

Three cases dysentery St. Vincent. No epidemic.

Cable communication north of St. Vincent has been interrupted since the volcanic eruption there on May 7. A few days ago the cable was put in operation, but communication is again interrupted.

Respectfully,

S. A. MACALLISTER,  
*United States Consul.*

The ASSISTANT SECRETARY OF STATE.

*Smallpox situation.*

BARBADOS, WEST INDIES, September 30, 1902.

SIR: I have to report that there have been 855 cases of smallpox since July 13, when the disease broke out. Of these 128 have been discharged as cured and 30 have died.

It will be observed that the percentage of deaths is very small. There has been a small decrease in the daily number of cases during the past few days.

Over 20,000 persons have been vaccinated, or about one-tenth of the entire population. Vaccination is going on rapidly.

Bills of health issued by me have full particulars.

Respectfully,

S. A. MACALLISTER,  
*United States Consul.*

The ASSISTANT SECRETARY OF STATE.

BRITISH HONDURAS.

*Weekly report of conditions and transactions at Belize—Fruit port.*

BELIZE, BRITISH HONDURAS, October 4, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended October 4, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 8. Causes of death: Encephalitis, 1; malarial cachexia, 1; malarial remittent fever, 1; gastro-ectasis, 1; erysipelas phlegmonous, 1; carbuncle, 1; phthisis pulmonalis, 1; tetanus, 1. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: October 2, steamship *Condor*; crew, 16; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none. October 3, steamship *Anselm*; crew, 41; passengers from this port, 3; passengers in transit, 14; baggage disinfected, 7 pieces.

Respectfully,

R. H. PETERS,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

## CANADA.

*Inspection of immigrants.*QUEBEC, CANADA, *October 12, 1902.*

SIR: I have the honor to report that for the week ended Saturday, October 11, 1902, 408 immigrants were inspected at this port with results as follows: Number inspected, 408; number passed, 402; number detained, 6.

Respectfully,

W. C. BILLINGS,  
*Assistant Surgeon.*

The SURGEON-GENERAL.

## CHINA.

*Reports from Hongkong—Cholera and plague.*HONGKONG, CHINA, *September 10, 1902.*

SIR: I have the honor to transmit herewith an abstract of the bill of health issued at this station during the week ended September 6, 1902. Five vessels were inspected prior to giving the bill of health and 1 bill of health was issued to the U. S. S. *Rainbow* on request of the medical officer aboard.

Two hundred and thirty-five individuals were bathed at the disinfecting station and 254 bundles of clothing and bedding were disinfected. The cholera situation in this city shows further improvement, 3 cases and 3 deaths having been reported during the week. This makes a total of 454 cases and 391 deaths in this colony since the beginning of the outbreak March 4, 1902.

There has also been great improvement in the plague situation, 1 case and 1 death having been reported. One case of smallpox, terminating fatally, and 2 cases of enteric fever were also reported in the colony during the week.

Respectfully,

JOHN W. KERR,  
*Assistant Surgeon.*

The SURGEON-GENERAL.

HONGKONG, CHINA, *September 16, 1902.*

SIR: I have the honor to transmit herewith an abstract of the bills of health issued at this station during the week ended September 13, 1902. Twelve vessels were inspected, 797 individuals were bathed at the disinfecting station, and 920 pieces of baggage were disinfected. There were 7 rejections during the week because of fever. The cholera situation in this city continues to show improvement, 1 case and 1 death having been reported to the sanitary authorities during the time covered by this report. Reports from north China indicate that the epidemic is subsiding. Tientsin, Tongku, and Taku have been declared free from infection by the Hongkong government. Only 1 case of plague (Japanese) was reported during the week, otherwise there were no communicable diseases reported.

Respectfully,

JOHN W. KERR,  
*Assistant Surgeon.*

The SURGEON-GENERAL.

*The colony declared free from plague—Presence of the disease among rodents.*

HONGKONG, CHINA, September 22, 1902.

SIR: I have the honor to transmit herewith an abstract of the bills of health issued at this station during the week ended September 20, 1902. Seven vessels were inspected, 402 individuals were bathed at the disinfecting station, and 521 pieces of baggage were disinfected. There were 7 rejections during the week from all causes. Because of damage received during the recent typhoon the disinfecting hulk was in dock for five days undergoing repairs. The plant was therefore not available for disinfection during that time.

No cases of plague having developed among human beings since September 8, 1902, the colony has been declared free from plague infection by the local authorities. This, however, does not take into account the prevalence of the disease among rodents, rats dead of plague having been found, during the week ended September 13, 1902, both in Hongkong and Kowloon. Four cases and 4 deaths from cholera were reported during the week, making a total in the city thus far since the beginning of the outbreak of 459 cases and 396 deaths. One case of diphtheria and 1 case of enteric fever were also reported during the week.

Respectfully,

JOHN W. KERR,  
Assistant Surgeon.

The SURGEON-GENERAL.

*Reports from Shanghai—Cholera situation.*

SHANGHAI, CHINA, September 6, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health issued at this port for the week ended September 6, 1902. There were inspected during the week 2 vessels, 68 crew, and 11 cabin passengers. Shipping orders were viséed for 30,007 pieces of freight and 294 pieces were rejected. One member of the crew of the schooner *F. M. Slade* was rejected on account of fever. Forty-three pieces cabin passengers' baggage were inspected.

The cholera situation is as follows:

*Cities.*—Nanking, epidemic, 40,000 deaths; Foochow, epidemic; Shouyanghsien, epidemic, 3,000 cases per day; Hsinchou, epidemic; Taiyuanfu, epidemic; Hsiaotientze, epidemic; Shouyang, epidemic; Shihlich, epidemic; Chenglohien, epidemic; Kinkiang, reported; Nanchangfu, reported; Sheoyang, reported; Hankow, reported; Tientsin, reported; Soochow, reported.

*Provinces.*—Hunan, reported; Shansi, reported.

The Japanese steamship *Saiho Maru*, Shanghai to Kobe via Nagasaki, developed 3 cases of cholera, it is reported, between the latter place and destination, and the *Kobe Maru*, Nagasaki to Shanghai, had 1 death from the disease. It is supposed that in both cases the disease was contracted in Nagasaki. It is reported that there have been 4,329 cases and 1,650 deaths from cholera in Japan.

One case of cholera developed among the crew of the ship *County of Roxbury*, lying in this harbor. As she is to sail for the United States, I have just finished disinfection of her living compartments and water-closets with sulphur dioxide and bichloride of mercury. She will be under observation five days before sailing.

During the week there were reported in the municipality 1 death

from smallpox, 49 deaths from cholera, and 3 from diphtheria. Among the European population there was 1 case of typhoid fever and 1 case of scarlet fever.

Respectfully,

S. H. RANSOM,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

SHANGHAI, CHINA, *September 14, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health issued at this port for the week ended September 13, 1902. There were inspected during the week 4 vessels, 133 crew, 3 first and 1 second cabin passengers, and 15 pieces of baggage. Shipping orders were viséed for 13,321 pieces of freight; 3 pieces were disinfected and 241 rejected. The living compartments, bath rooms, and water-closets of 1 ship were disinfected on account of 1 case of cholera having occurred among the crew, sulphur gas and 5 per-cent of bichloride of mercury solution 1-500 being used for the purpose. Bedding and clothing had to be subjected to sulphur gas, there being no other method of disinfection available here.

There was some falling off in the number of cholera cases in the interior, so far as I can learn, while in the municipality the situation was as follows: Deaths among natives, 23; no deaths among whites.

The other diseases reported were 4 typhoid fever and 1 scarlet fever among Europeans, and 1 death from the latter disease among Chinese.

Respectfully,

S. H. RANSOM,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

COLOMBIA.

*Weekly report of conditions and transaction at Bocas del Toro—Fruit port.*

BOCAS DEL TORO, COLOMBIA, *October 7, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended October 6, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing diseases, malarial. The 1 death noted was an adult female, and due to tuberculosis. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: October 1, steamship *Hispania*; crew, 22; passengers from this port, none; passengers in transit, none; baggage disinfected, none. October 4, steamship *Harald*; crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Colombia*; crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

PAUL OSTERHOUT,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

## COSTA RICA.

*Weekly reports of conditions and transactions at Port Limon—Fruit port—Yellow fever.*

PORT LIMON, COSTA RICA, October 9, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended October 9, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week—cases, 3; deaths, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 5. Prevailing diseases were yellow fever and malarial fever. General sanitary condition of this port and the surrounding country during the week has not been good. Five deaths occurred in this port—1 white adult female, 2 white adult males, and 2 colored adult males, due to the following causes: Malarial fever, 1; pulmonary tuberculosis, 1; bilious remittent fever, 1; cerebral apoplexy, 1, and tertiary syphilis, 1. Those cases of yellow fever originating here were admitted to a hospital on the 6th and 7th instant, and were all white adult males, 1 Italian and 2 Costa Ricans.

Bills of health were issued to the following vessels: October 2, steamship *Olympia*; crew, 38; passengers from this port, none; passengers in transit, none; baggage disinfected, none. October 4, steamship *S. Oteri*; crew, 31; passengers from this port, none; passengers in transit, none; baggage disinfected, none. October 6, steamship *Altai*; crew, 45; passengers from this port, 8; passengers in transit, 1; baggage disinfected, none. October 8, steamship *Preston*; crew, 47; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Manuel Calvo*; crew, 119; passengers from this port, none; passengers in transit, 60; baggage disinfected, none.

Respectfully,

WM. H. CARSON,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

## CUBA.

*Report from Santiago de Cuba—Decrease in number of deaths.*

SANTIAGO DE CUBA, October 7, 1902.

SIR: Through Asst. Surg. F. E. Trotter, at Havana, I have the honor to forward herein the report for the month of September, 1902. I can not explain the sudden great decrease in the number of deaths. Comparing the last three months with the corresponding period of last year, I find there was a marked decrease last year also, as will be shown by the following: 1901, July, 107; August, 100; September, 67. 1902, July, 83; August, 81; September, 48.

Respectfully,

RICHARD WILSON,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

## EGYPT.

*Cholera situation.*CAIRO, EGYPT, *September 18, 1902.*

SIR: I have the honor to confirm the following cablegram:

CAIRO, EGYPT, *September 18, 1902.*SECRETARY OF STATE, *Washington:*

Since 7th instant 7,112 deaths, all Egypt. Total cases since outbreak, 23,017; 18,500 deaths, 1,050 cures. Situation at Cairo improving. Growing worse at Alexandria. Port Said, Suez, and Luxor affected.

SMITH.

For the six days ended at noon to-day the figures furnished by the sanitary department are as follows:

Cities.	Cases.	Deaths.	Cures.	Cities.	Cases.	Deaths.	Cures.
Cairo.....	24	102	13	Port Said .....	2	4	.....
Alexandria.....	120	210	10	Ismailia.....	4	12	.....
Suez.....	12	8	.....				

Respectfully,

H. T. SMITH,

*Vice Consul General, In Charge.*

THE ASSISTANT SECRETARY OF STATE.

CAIRO, EGYPT, *September 22, 1902.*

SIR: I have the honor to confirm the following cablegram regarding the progress of the cholera epidemic in Egypt:

CAIRO, EGYPT, *September 21, 1902.*

SECRETARY OF STATE, *Washington:*

Since 13th instant 7,235 cases, 6,651 deaths, all Egypt. General condition improving rapidly.

SMITH.

I am glad to be able to report a marked decrease in the number of new cases and deaths and an increase in the number of cures in the various provinces.

While the country is still sorely stricken, a decided change for the better is noticeable in each succeeding daily bulletin now received from the sanitary department.

The following will show the number of new cases, deaths, and cures in the principal cities and provinces for the seven days ended at noon on Saturday:

Egypt.	New cases.	Deaths.	Cures.	Egypt.	New cases.	Deaths.	Cures.
<b>Cities:</b>				<b>Provinces—Cont'd.</b>			
Cairo.....	28	102	11	Ghergueg.....	321	463	87
Alexandria.....	82	208	53	Charkieh.....	308	449	173
Port Said .....	2	3	.....	Behera.....	203	500	88
Damietta.....	52	182	15	Galioubieh.....	202	310	124
Suez.....	31	41	4	Ghizeh.....	143	214	62

Dakalieh.....	352	750	217	Minieh.....	57	103	50

Respectfully,

H. T. SMITH,

*Vice Consul-General, In Charge.*

THE ASSISTANT SECRETARY OF STATE.

*Cholera in Suez.*

PORT TEWFIK-SUEZ, EGYPT, *September 23, 1902.*

SIR: I have the honor to inform you that since my first report, dated September 16, the progress of cholera in this district has been greater than was at first anticipated.

From September 16 until yesterday there have been 40 new cases with 33 deaths, and 1 case at Port Tewfik, five days ago. During the past thirty-six hours there seems to be an improvement, and Dr. Creswell, the English sanitary director of Suez, entertains some hope of

stamping out the disease within a short time. Once it has been stopped the isolated position of Suez may prevent any further outbreak.

The larger number of cases have occurred in outlying quarters and, strangely enough, in the most sparsely populated parts of the town. The greater number of hamlets along the fresh water canal running from Ismailia to Suez have been visited by cholera.

Respectfully,

ALFRED W. HAYDN,  
*United States Consular Agent.*

The ASSISTANT SECRETARY OF STATE.

#### ENGLAND.

##### *Report from London.*

LONDON, ENGLAND, *October 2, 1902.*

SIR: I have the honor to state that the following cases of infectious disease were reported to the local health authorities for the week ended September 27, 1902: Smallpox, 4; scarlet fever, 388; diphtheria, 125; enteric fever, 58. At the close of the week there were 42 cases of smallpox, 2,703 of scarlet fever, 989 of diphtheria, and 360 of enteric fever under treatment. The 4 deaths from smallpox in England belonged to Liverpool, Warrington, Sunderland, and Swansea, respectively. In the 76 great towns of England and Wales, estimated population 14,862,084, the deaths during the week corresponded to an annual rate of 17.5 per 1,000—the three preceding weeks being 15.9, 16.4, and 17.7.

Respectfully,

JOHN McMULLEN,  
*Passed Assistant Surgeon.*

The SURGEON-GENERAL.

#### GERMANY.

##### *Report from Berlin—Plague and cholera in various countries.*

BERLIN, GERMANY, *October 6, 1902.*

SIR: I have the honor to transmit herewith the latest information regarding plague and cholera, obtained from the imperial health office (Kaiserlichen-Gesundheitsamt), at Berlin.

##### *Plague.*

RUSSIA.—According to an official statement in the Government Gazette of September 23, there have been registered in Odessa since June 10, 29 cases of suspected plague, of which 10 ended in death.

EGYPT.—During the week ended September 19, 2 cases of plague were registered in Alexandria.

CHINA.—In Swatau since the second week of August the plague has been entirely stamped out, neither have any further cases been reported from neighboring districts.

BRAZIL.—*Rio de Janeiro.*—Between August 15 and August 29, 4 more deaths from plague were registered. Apparently there were also a large number of plague patients under treatment in the city.

QUEENSLAND.—According to a recent report it appears that up to

August 16 no fresh case of plague had been recorded in the colony, neither have any more plague-infected rats been found.

*Plague and cholera.*

BRITISH INDIA.—In Calcutta during the week from August 17 to August 23, 10 persons died of plague and 12 of cholera.

Respectfully,

FRANK H. MASON,  
*United States Consul-General.*

The SURGEON-GENERAL.

*Cholera in various countries.*

BERLIN, GERMANY, *October 7, 1902.*

SIR: I have the honor to transmit herewith the latest information regarding cholera obtained from the imperial health office (Kaiserlichen Gesundheitsamt), at Berlin:

RUSSIA.—According to the official reports published in the Government Gazette of September 23, the following cholera cases were registered during the three weeks from August 25 to September 14: Port Arthur, 48, 54, 45; Dalnij, 29, 14, 5; Blagoweschtschensk, 22, 8, 4; Vladivostock, 69, 43, 24; Chabarowsk, 32, 4, —; Nikolajewsk, 3, 7, 15; Nikolsk, 7, 5, —.

EGYPT.—According to a report of the director-general of the Egyptian department of health, the cholera epidemic continues to claim a large number of victims. The number of infected places increased to 1,557. The number of cases registered during the week ended September 15 amounted to 9,467, with 8,278 deaths.

Of the 28,520 cases of cholera registered between July 15 and August 15, only 3,033 were cured, the total number of deaths from cholera recorded during this period amounting to 23,684.

During the four days from September 15 to September 19 the following cholera cases were registered: One thousand one hundred and three, 1,026, 1,013, 906, altogether 4,048 cases, and 1,011, 953, 974, 823 deaths, altogether 3,761 deaths from cholera. In Suez, between September 15 and September 19, 29 fresh cases were registered. In Damietta the daily number of cases recorded is said to be 30. Karnak and Luxor are also infected with the disease.

In Alexandria during the week ended September 15, 64 cases of cholera occurred among Europeans, with 41 deaths, and during the following five days 35 cases and 25 deaths were recorded.

CHINA.—According to a report dated July 29 the cholera appears to have been on the decrease with the beginning of the rainy season in Tsinanfu, but in the east and south of this province the disease continues to spread.

Amoy has been, since August 20, declared free from cholera. In Swatau the epidemic has been almost stamped out.

Respectfully,

FRANK H. MASON.  
*United States Consul-General.*

The SURGEON-GENERAL.

*Health of Berlin—Weekly death rate.*

BERLIN, GERMANY, *October 2, 1902.*

SIR: I have the honor to report that during the week ended September 20 the health of Berlin continued to be favorable. The death rate was again very low, amounting to 13.7 per 1,000—that is to say, lower

than in any of the three foregoing weeks and than the corresponding week of last year. Of the large German cities, Hamburg showed an equally favorable condition. Kiel and Charlottenburg (with 12.4 per 1,000) had lower death rates. All the other towns showed higher figures. To the latter belonged Schöneberg, with 14.2. Considerably higher than that of Berlin was the mortality in London, Paris, Vienna, Munich, and Leipzig. The participation of children in the first year in the mortality was much lower than during any of the three preceding weeks. The death rate among infants fell since the second week of September from 5.5 to 4.1 per 1,000, and was thus only one-third of that of Leipzig, Munich, Cologne, and Düsseldorf. Acute diseases of the intestines were of less frequent occurrence than in the first two weeks of September and claimed 95 victims (as compared with 131 and 126). There were registered 31 deaths from diseases of the respiratory organs, the same number as in the foregoing week. Consumption claimed 67 victims, this number being higher than in any week since the beginning of September. Three persons died by violence.

Respectfully,

FRANK H. MASON,  
*United States Consul-General.*

The SURGEON-GENERAL.

#### GUATEMALA.

*Weekly report of conditions and transactions at Livingston—Fruit port.*

LIVINGSTON, GUATEMALA, October 7, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended October 7, 1902:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: October 7, steamship *Managua*; crew, 16; passengers from this port, none; passengers in transit, 2; baggage disinfected, none.

Respectfully,

GUY A. DARCANTEL,  
For A. J. SMITH,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

#### HAWAII.

*Outgoing quarantine transactions.*

HONOLULU, H. I., October 6, 1902.

SIR: I have the honor to make the following report in regard to outgoing quarantine transactions at this port for the week ended October 4, 1902, and for October 5, 1902: Number of steamships inspected and passed, 2; number of sailing vessels inspected and passed, 6; number of cabin

passengers inspected and passed, 116 ; number of steerage passengers inspected and passed, 75 ; number of crew inspected and passed, 70 ; number of sailing vessels disinfected, 2.

Respectfully,

W. C. HOBDY,

*Assistant Surgeon, In Temporary Charge.*

The SURGEON-GENERAL.

*Outgoing quarantine removed.*

HONOLULU, H. I., October 6, 1902.

SIR : I have the honor to inform you that the outgoing quarantine was taken off on the 5th instant, as it has been thirty days since the last case of plague in Honolulu.

Respectfully,

W. C. HOBDY,

*Assistant Surgeon, In Temporary Charge.*

The SURGEON-GENERAL.

[Telegram.]

HONOLULU, H. I., October 15,  
*via San Francisco, Cal., October 21, 1902.*

WYMAN, Washington, D. C.:

There was a death from plague at Honolulu on October 14.

HOBDY.

#### HONDURAS.

*Weekly report of conditions and transactions at La Ceiba—Fruit port.*

LA CEIBA, HONDURAS, October 11, 1902.

SIR : I have the honor to make the following report of the conditions and transactions at this port during the week ended October 11, 1902 :

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none ; number of cases and deaths from smallpox during the week, none ; number of cases and deaths from typhus fever during the week, none ; number of cases and deaths from cholera during the week, none ; number of cases and deaths from plague during the week, none ; number of deaths from other causes during the week, 2. Prevailing diseases, malarial. Causes of above 2 deaths—1 suicide, the other malaria (in a child). General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels : October 5, Norwegian steamship *Gwent* ; crew, 16 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. October 8, American schooner *Santo Oteri* ; crew, 7 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. October 9, American steamship *David* ; crew, 24 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. October 11, Norwegian steamship *Geo. Dumois* ; crew, 17 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none.

Respectfully,

W. B. ROBERTSON,

*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

*Weekly report of conditions and transactions at Puerto Cortez—Fruit port.*

PUERTO CORTEZ, HONDURAS, October 9, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended October 9, 1902:

Population according to census of 1896, 1,856; present officially estimated population, 2,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from small-pox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: October 2, steamship *Anselm*; crew, 41; passengers from this port, 11; passengers in transit, 3; baggage disinfected, 26 pieces. October 3, steamship *Bratten*; crew, 15; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

SAMUEL HARRIS BACKUS,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

## ITALY.

*Reports from Naples—Inspection at Palermo—Cholera in Egypt and Arabia and plague in Russia.*

NAPLES, ITALY, September 29, 1902.

SIR: I have the honor to report that for the week ended September 27, 1902, the following ships were inspected at Naples:

September 23, the steamship *Leon XIII*, of the Spanish Trans-Atlantic Line, bound with passengers and cargo for New York. There were inspected and passed 338 steerage passengers and 60 pieces of large baggage; 700 pieces of baggage were disinfected by steam. The rejection of 30 steerage passengers was advised. September 24, the steamship *Citta di Palermo*, bound with cargo for New York; the steamship *Sardigna*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 996 steerage passengers and 250 pieces of large baggage; 1,100 pieces of baggage were disinfected by steam. The rejection of 54 steerage passengers was advised. September 25, the steamship *Trave*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 682 steerage passengers and 163 pieces of large baggage; 750 pieces of baggage were disinfected by steam. The rejection of 46 steerage passengers was advised. September 27, the steamship *Georgia*, of the Hamburg American Line, bound with passengers and cargo for New York. There were inspected and passed 599 steerage passengers and 110 pieces of large baggage; 750 pieces of baggage were disinfected by steam. The rejection of 25 steerage passengers was advised; the steamship *Vancouver*, of the Dominion Line, bound with passengers and cargo for Boston. There were inspected and passed 881 steerage passengers and 285 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam. The rejection of 35 steerage passengers was advised.

*Inspection at Palermo.*

At Palermo for the week ended September 27, 1902, the following steamship was inspected: September 25 and September 26, the steamship

*Algeria*, of the Anchor Line, bound with passengers and cargo for New Orleans. There were inspected and passed 867 steerage passengers; 895 pieces of baggage were disinfected by steam. The rejection of 70 steerage passengers was advised.

*Asiatic cholera in Egypt.*

According to reports from Alexandria, the cholera statistics in Egypt are as follows: September 18, Cairo, new cases, 17; deaths, 15. Alexandria, new cases, 31; deaths, 24. Other districts, new cases, 858; deaths, 784. September 19, Cairo, new cases, 21; deaths, 18. Alexandria, new cases, 35; deaths, 29. Other districts, new cases, 758; deaths, 565. September 20, Cairo, new cases, 11; deaths, 12. Alexandria, new cases, 41; deaths, 32. Other districts, new cases, 649; deaths, 571. For the week ended September 20, the total figures are, new cases, 6,587; deaths, 5,983 against fresh cases, 9,805, and deaths 8,497, the previous week. With the week ended September 20, there has been since the beginning of the epidemic, July 15, 1902, 30,931 cases, with 25,734 deaths. September 21, Cairo, new cases, 15; deaths, 13. Alexandria, new cases, 28; deaths, 24. Other districts, new cases, 769; deaths, 666. September 22, Cairo, new cases, 15; deaths, 11. Alexandria, new cases, 36; deaths, 23. Other districts, new cases, 675; deaths, 576. September 23, Cairo, new cases, 18; deaths, 16. Alexandria, new cases, 25; deaths, 26. Other districts, new cases, 593; deaths, 499. September 24, Cairo, new cases, 13; deaths, 13. Alexandria, new cases, 35; deaths, 31. Other districts, new cases, 575; deaths, 607. September 25, Cairo, new cases, 9; deaths, 9. Alexandria, new cases, 20; deaths, 17. Other districts, new cases, 558; deaths, 461.

*Bubonic plague in Russia.*

Under date of September 18, 1902, it was reported that during the past six days, 4 new cases of bubonic plague had been reported at Odessa. This brought the number of cases of plague at Odessa since the beginning of the epidemic at that port to a total of 23 cases.

Respectfully,

J. M. EAGER,

*Passed Assistant Surgeon.*

The SURGEON-GENERAL.

NAPLES, ITALY, October 6, 1902.

SIR: I have the honor to report that for the week ended October 4, 1902, the following ships were inspected at Naples:

September 30, the steamship *Patria*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 945 steerage passengers and 240 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam. The rejection of 34 steerage passengers was advised.

October 2, the steamship *Aller*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 561 steerage passengers and 163 pieces of large baggage; 750 pieces of baggage were disinfected by steam. The rejection of 19 steerage passengers was advised. The steamship *Sicilian Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 725 steerage passengers and 200 pieces of large baggage; 850 pieces of baggage were disinfected by steam. The rejection of 30 steerage passengers was advised.

October 3, the steamship *Perugia*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed

1,209 steerage passengers and 230 pieces of large baggage ; 1,400 pieces of baggage were disinfected by steam. The rejection of 46 steerage passengers was advised.

October 4, the steamship *Citta di Napoli*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 1,418 steerage passengers and 150 pieces of large baggage ; 1,600 pieces of baggage were disinfected by steam. The rejection of 91 steerage passengers was advised.

*Inspection at Palermo.*

At Palermo for the week ended October 4, 1902, the following ships were inspected :

September 29 and September 30, the steamship *Manilla*, of the Italian General Navigation Company, bound with passengers and cargo for New Orleans. There were inspected and passed 1,278 steerage passengers ; 1,707 pieces of baggage were disinfected by steam. The rejection of 118 steerage passengers was advised.

October 4, the steamship *Sicilian Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 390 steerage passengers ; 500 pieces of baggage were disinfected by steam. The rejection of 57 steerage passengers was advised.

*Asiatic cholera in Egypt.*

The cholera reports from Egypt are as follows : September 26, Cairo, new cases, 4 ; deaths, 3. Alexandria, new cases, 23 ; deaths, 24. Other districts, new cases, 422 ; deaths, 386. September 27, Cairo, new cases, 3 ; deaths, 3. Alexandria, new cases, 25 ; deaths, 17. Other districts, new cases, 461 ; deaths, 474. September 28, Cairo, new cases, 8 ; deaths, 9. Alexandria, new cases, 29 ; deaths, 24. Other districts, new cases, 361 ; deaths, 356.

For the week ended September 27, 1902, the total figures were, new cases, 4,421 ; deaths, 3,902. To the end of the week there had been from the beginning of the epidemic, July 15, 1902, in all Egypt, 35,374 cases and 29,753 deaths. The number of localities declared infected is 1,890. Among those ill with cholera, only 291 were Europeans.

*Asiatic cholera at Medina.*

Reports from Constantinople dated October 1, 1902, state that cholera has appeared at Medina, Arabia, and that in two days there were 18 deaths.

*Bubonic plague in Smyrna.*

Under date of October 3, 1902, it was reported that 2 cases of suspected bubonic plague had occurred at Smyrna.

Respectfully,

J. M. EAGER,  
Passed Assistant Surgeon.

The SURGEON-GENERAL.

JAPAN.

*Report from Yokohama—Cholera situation.*

YOKOHAMA, JAPAN, September 27, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health for the week ended September 20, 1902. Bills of health were issued to 4 vessels having a total personnel of 305 crew and 454 passengers; 375

steerage passengers were bathed, and 385 pieces of baggage were disinfected.

No official report of infectious diseases in Yokohama for the week ended September 20 has been received by me. The newspapers report 1 case of cholera as occurring in this city, which, however, until officially confirmed, may be regarded as doubtful.

As to the Empire in general, judging from the incomplete data which have reached me, the cholera situation has shown no decided change during the period under consideration.

The appended data show total cases reported from some of the infected prefectures from present outbreak to September 22.

Name of ken.	Total cases.	Total deaths.
Fukuoka Ken.....	1,042	646
Hiroshima Ken.....	706	.....
Kagawa Ken.....	2,344	.....
Okayama Ken.....	2,140	1,455

The important city of Osaka is reported to be suffering from a rather severe epidemic of cholera.

Respectfully,

DUNLOP MOORE,  
*Assistant Surgeon.*

The SURGEON-GENERAL.

#### MEXICO.

*Conditions and transactions at Progreso from August 14 to October 4, 1902.*

NORFOLK, VA., October 15, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at Progreso, Mexico, from August 14 to October 4, 1902: Number of cases yellow fever, 7; number of deaths, yellow fever, 6; number of deaths from all causes, 54.

Bills of health were issued to 34 vessels having a personnel of 754 officers and crew, and 242 passengers. One hundred and six health certificates were issued to passengers for the United States and Cuba. Seven sick shipwrecked American seamen were treated at the consulate.

Respectfully,

E. T. HARGRAVE,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

*Mosquitoes on vessels at anchorage at Progreso.*

NORFOLK, VA., October 15, 1902.

SIR: Referring to Bureau's letter of August 19, directing me to investigate and report on the points brought out in the inclosed letter from Surgeon Carter, dated March 8, 1902, relative to the presence aboard vessels at their anchorages of the *stegomya fasciata*, I have to report as follows:

The Ward Line steamships (which carry most of the passengers from Progreso) anchor from 1 to 3 miles from shore, and their anchorage is free from mosquitoes. Owing to my illness six days after receiving order, I did not have an opportunity of examining more than 1 vessel of that line, the *Monterey*, September 6, 1902, on which I could find no mosquitoes.

I examined 6 vessels at the docks, 300 or 400 yards from shore, and

found none, though some of the crew of 1 vessel were bitten by mosquitoes during the prevalence of a land breeze.

For a period of six days I slept on board a tug at one of the docks, at night, and I was not bitten. None of the crew of vessels lying at the docks complained of or even saw them during a sea breeze, which prevails most of the time.

The anchorages of ships out in the stream I regard as safe, but those at the docks during a land breeze are, to say the least, doubtful.

Respectfully,

E. T. HARGRAVE,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

TAMPICO, MEXICO, *October 13, 1902.*

SIR: I have the honor to transmit herewith an abstract of the bills of health issued at this office for the week ended October 11, 1902. There were officially reported during the same period 2 new cases of yellow fever, one of which died yesterday, October 12, 1902. The total number of deaths recorded for the week was 14, of which 6 were due to pneumonia and 3 to malaria.

A norther, which began blowing Friday, October 3, 1902, and continued to blow for several days, accompanied by a sudden drop in the temperature, amounting to 10° C., is undoubtedly responsible for the appearance of considerable pneumonia in this city and vicinity. There has also been a decided increase in the number of mosquitoes since, particularly of the *Anopheles albipes* [Theobald], and, so far as I am able to judge, with some increase in the number of acute cases of malaria, or calentura, as it is called here.

The sanitary condition of the port continues to be fairly satisfactory.

Respectfully,

JOS. GOLDBERGER,  
*Assistant Surgeon.*

The SURGEON-GENERAL.

*Reports from Vera Cruz.*

VERA CRUZ, MEXICO, *October 12, 1902.*

SIR: I have the honor to make the following report for the week ended October 11, 1902: From yellow fever there were reported 5 cases and 2 deaths. Eight deaths were reported from pernicious fever, 4 from remittent, 5 from tuberculosis, and 51 from all causes. The atmospheric conditions have improved since the last norther, and with the coming of the cool weather there is a diminution in the number of cases and deaths from yellow fever, but the general mortality remains about the same as the other fevers seem to increase as the yellow fever declines.

There were no cases of sickness among the passengers or crews of the vessels leaving port during the week.

Respectfully,

S. H. HODGSON,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

*Transactions during the period from July 1 to September 15, 1902.*

VERA CRUZ, MEXICO, *September 19, 1902.*

SIR: I have the honor to make the following supplemental report of the transactions of this port during the period from July 1 to September

15, 1902: During this period 49 original bills of health were issued to vessels bound to the United States; 25 supplementals issued to vessels coming via this port, and 27 originals issued for the Republic of Cuba. These 121 vessels carried a total of 5,529 crew and 1,482 passengers, all of whom were inspected before sailing. There is no inspection or disinfection of baggage from this port, and no means of disinfecting vessels except sulphur pots.

Respectfully,

S. H. HODGSON,  
*Acting Assistant Surgeon.*

The SURGEON-GENERAL.

#### PHILIPPINE ISLANDS.

MANILA, P. I., August 28, 1902.

SIR: I have the honor to transmit herewith weekly report of cholera in the Philippine Islands for the period ended August 9, 1902. The disease has decreased in Manila, but still remains severe in the provinces, especially those recently infected. The report from the provinces represents only about one-half of the cases that occurred, since no reports were received for four days. During the week the disease has spread overland to Ilocos Norte, and this province is badly infected. A number of towns in the island of Bohol, adjacent to Cebu, have become infected by reason of bancas, and owing to this class of boats, the ignorance of the natives, and the ineffectiveness of the provincial boards of health, I think it is only a question of a short time before all the islands will be badly infected and will have a severe epidemic.

Respectfully,

J. C. PERRY,  
*Passed Assistant Surgeon,  
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

*Cholera report for the week ended August 16, 1902.*

MANILA, P. I., August 28, 1902.

SIR: I have the honor to transmit herewith cholera report for the Philippine Islands for the week ended August 16, 1902. During this period little, if any, change has taken place. The disease remains about stationary in Manila, and continues to spread in the provinces from the causes already cited.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon,**Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

*Cholera report for the week ended August 23, 1902.*

MANILA, P. I., September 4, 1902.

SIR: I have the honor to hereby submit report of cholera in the Philippine Islands for the week ended August 23, 1902. The disease remains about stationary in Manila and continues severe in the provinces. During this period two important centers, Aparri and Iloilo, have become infected. Aparri, in the extreme northern part of the island of Luzon, is the outlet of Cagayan Valley, consequently a spread of the disease in this populous and fertile district is to be expected. The other place of importance, Iloilo, is on the island of Panay. The disease was brought to this town by bancas from the adjacent island of Negros.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon,**Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

*Cholera report for the week ended August 30, 1902.*

MANILA, P. I., September 6, 1902.

SIR: I have the honor to transmit for your information reports of cholera in the Philippine Islands for the week ended August 30, 1902. During this period there is little news to report, except that the towns adjacent to Iloilo, in the island of Panay, are suffering from a severe epidemic.

Respectfully,

J. C. PERRY,

*Cholera report for the week ended September 6, 1902.*

MANILA, P. I., September 13, 1902.

SIR: I have the honor to hereby transmit report of the cholera epidemic in the Philippine Islands for the week ended September 6, 1902. During the period embraced by the report no radical changes have taken place. However, I think the situation in Manila is improving. Iloilo and the adjacent towns are suffering severely, and Jaro especially so, since this town only has a population of about 4,000 inhabitants.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon,**Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

*Cholera report for the week ended September 13, 1902.*

MANILA, P. I., September 19, 1902.

SIR: I have the honor to transmit herewith report of cholera in the Philippine Islands for the week ended September 13, 1902. The condition in Manila is improving, but little change has occurred in the provinces. The disease has practically disappeared from those first infected, but those most recently infected are suffering severely. The province of Iloilo and the adjacent island of Negros are badly infected and the situation is alarming. Some of the towns in these provinces have lost 10 per cent of their population, and the epidemic still continues severe. Up to date of this report, 58,147 cases and 40,707 deaths from cholera have been reported in the islands, which in itself is of sufficient gravity, but when 30 per cent is added for unreported cases a more correct picture of the ravages of the disease is produced. I consider a conservative estimate of the cases of cholera that have actually occurred in the islands since March 20, 1902, to be 75,000, with a mortality of 75 per cent.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon,**Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

*Corrected provincial report to date.*—Provinces, 54,173 cases, 37,713 deaths; Manila, 3,974 cases, 2,994 deaths; total, 58,147 cases, 40,707 deaths.

*Cholera situation in Cebu.*

MANILA, P. I., August 24, 1902.

SIR: I have the honor to transmit for your information daily cholera report of Cebu, P. I., furnished this office by Asst. Surg. H. A. Stansfield.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon,  
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

[Inclosures.]

CEBU, P. I., August 19, 1902.

SIR: I have the honor to transmit the following cholera report for this city since my last letter dated August 6. Since then I have sent 2 telegrams. The reports in those telegrams are also included in this letter.

August 7, cases, 42; deaths, 17; August 8, cases, 53; deaths, 17; August 9, cases, 41; deaths, 20; August 10, cases, 64; deaths, 29; August 11, cases, 38; deaths, 24; August 12, cases, 48; deaths, 19; August 13, cases, 44; deaths, 34; August 14, cases, 42; deaths, 25; August 15, cases, 38; deaths, 22; August 16, cases, 39; deaths, 18; August 17, cases, 49; deaths, 31; August 18, cases, 24; deaths, 16. Total, cases, 522; deaths, 272.

*By nationalities.*—Americans, cases, none; deaths, none; Filipinos, cases, 517; deaths, 270; Chinese, cases, 4; deaths, 2; Spaniards, case, 1; deaths, none.

This report shows a decided increase in the number of daily cases since last one made. In other respects the situation is unchanged. Little or nothing is done here to combat the infection.

Respectfully,

H. A. STANSFIELD,  
Assistant Surgeon.

Surg. J. C. PERRY,

Chief Quarantine Officer for the Philippine Islands.

CEBU, P. I., August 25, 1902.

SIR: I have the honor to transmit report of cholera cases in this city from August 19 to August 23, both inclusive, as follows:

August 19, cases, 12; deaths, 7; August 20, cases, 18; deaths, 13; August 21, cases, 15; deaths, 6; August 22, cases, 16; deaths, 11; August 23, cases, 14; deaths, 7. Total, cases, 75; deaths, 44.

*By nationalities.*—Filipinos, 73 cases, 42 deaths; Chinese, 2 cases, 2 deaths.

This report shows a marked decrease in the daily number of cases. The situation in the outlying towns is not so good. Dumanjug, Toledo, Barili, and Alcantara on the west coast have become infected, most likely by land travel. Carcar, Sibonga, Naga on the east coast have also reported cases. It is said to be in Calope, Bohol, but no definite news can be obtained from there. Tubigon is infected. Natives have told me that Bohol was infected before this island, but no positive evidence of this can be obtained, as there is a general tendency to deny infection whenever possible.

Respectfully,

H. A. STANSFIELD,  
Assistant Surgeon.

Surg. J. C. PERRY,

Chief Quarantine Officer for the Philippine Islands.

CEBU, P. I., August 30, 1902.

SIR: I have the honor to transmit report of cholera cases in this city from August 24 to August 29, 1902, both dates inclusive, as follows:

August 24, new cases, 10; deaths, 12; August 25, new cases, 14; deaths, 9; August 26, new cases, 9; deaths, 5; August 27, new cases, 8; deaths, 5; August 28, new cases, 3; deaths, 4; August 29, new cases, 8; deaths, 5; total, new cases, 52; deaths, 40.

*By nationalities.*—Filipinos, cases, 51; deaths, 39; Chinese, cases, 1; deaths, 1.

The reports since August 17 show a steady decrease in the number of daily cases. The total number to date is 1,205 cases and 662 deaths.

Respectfully,

H. A. STANSFIELD,  
Assistant Surgeon.

P. A. Surg. J. C. PERRY,

Chief Quarantine Officer for the Philippine Islands.

CEBU, P. I., September 6, 1902.

SIR: I have the honor to transmit report of cholera at this port from August 31 to September 4, 1902, as follows:

August 31, new cases, 3; deaths, 2; September 1, new cases, 1; deaths, 2; September 2, new cases, none; deaths, none; September 3, new cases, 1; deaths, none; September 4, new cases, 4; deaths, 4; total, 9 cases and 8 deaths, all cases being Filipinos. Total number of cases and deaths to date as follows: One thousand two hundred and nineteen cases and 672 deaths. This shows a marked decrease at this port.

Respectfully,

H. A. STANSFIELD,  
Assistant Surgeon,

P. A. Surg. J. C. PERRY,

Chief Quarantine Officer for the Philippine Islands.

*Quarantine transactions for the month of July, 1902.*MANILA, P. I., *August 18, 1902.*

## PORTO RICO.

*Report from San Juan—Quarantine transactions—Vital statistics.*

SAN JUAN, P. R., October 6, 1902.

SIR: I have the honor to submit herewith the following report of quarantine transactions at this and the 6 subports of the island of Porto Rico for the month of September, 1902:

*San Juan.*—Number of vessels inspected, 12; number of bills of health issued, 22; number of vessels held in quarantine, 4; number of pieces of baggage disinfected, 32; number of sacks of mail disinfected, 11; number of persons detained in quarantine at the island, none; number of persons vaccinated, 3; number of vessels disinfected, none.

The French steamship *Saint Simon*, from St. Marc, Gonaives, Port au Prince, Cape Haitien, Puerto Plata, and Sanchez, arrived upon the 17th instant. All bills of health clean, and all passengers for Porto Rico considered immune and allowed to land. This vessel was held in quarantine under guard while she remained in port. Seven pieces of baggage and 4 sacks of mail were removed to the quarantine station and disinfected.

On the 18th the Spanish steamship *Buenos Aires* arrived from Havana, Port Limon, Colon, Sabanilla, Puerto Cabello, La Guaira, via Ponce. It was found upon inspection of this vessel that one of the steerage passengers from Lima, who embarked at Colon, after a two days' stay at the latter place, was suffering from a suspicious illness. The steamship was placed in quarantine under guard, and the body of the passenger, who died on the night of the 18th, removed on the following day to the quarantine station and buried there after an autopsy was held. The diagnosis in this case, owing to certain peculiar conditions, could not be determined, and can only be regarded as "suspicious" until the result of the examination of the pathological specimens from the cadaver is had. The steamship declined disinfection here, sailing for European ports on the 19th. One sack of mail for San Juan taken from this steamship required disinfection.

The Cuban steamships *Julia* and *Maria Herrera*, of the Herrera Line, arrived at this port upon the 19th and 28th, respectively. These vessels were upon their regular schedules from Cuban and Dominican ports, and both had undergone their usual disinfection at Santiago de Cuba prior to clearing for Porto Rico, and as the bills of health presented by both were clean they were granted free pratique. They carried no non-immune passengers for Porto Rico. The *Julia* carried 5 pieces of baggage and 1 sack of mail, and the *Maria Herrera* 15 pieces of baggage and 1 sack of mail, which were required to be disinfected here.

The steamships *Caracas* and *Philadelphia*, of the American Red D. Line, were both placed in quarantine under guard upon their arrival here upon the 10th and 24th, respectively. These steamships entered from ports in Venezuela and both presented foul bills of health signed by the American consul at La Guaira, Venezuela. The *Philadelphia* brought 5 pieces of baggage and 4 sacks of mail requiring disinfection. Both vessels remained in port for a few hours only to take passengers, mail, and a small amount of cargo for New York.

The following embraces the number of vessels inspected at each of the subports during the month: Mayaguez, 7; Arecibo, 2; Humacao, 5; Aguadilla, none; Fajardo, 1; Arroyo, none.

The following are the mortality statistics from the subports: Maya-

guez, 111; Arecibo, 125; Humacao, 22; Aguadilla, 42; Fajardo, 21; Arroyo, 13.

Respectfully,

H. S. MATHEWSON,  
Passed Assistant Surgeon,  
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

*Reports from Ponce.*

PONCE, P. R., September 29, 1902

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended September 27, 1902. During the week two vessels were inspected, one passed, and the German steamship *Hispania*, from La Guaira, Puerto Cabello, Curaçao, Oquen, and St. Thomas, was held in quarantine. No cargo or passengers for this port. This vessel loaded cargo in quarantine and sailed on the same day. Eight bills of health were issued.

On the 28th instant I invited the physicians of the city and others interested to visit the disinfecting barge and inspect the machinery in operation. They seemed very much interested and pleased that this port should be well equipped.

Respectfully,

W. W. KING,  
Assistant Surgeon.

The SURGEON-GENERAL.

PONCE, P. R., October 6, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended October 4, 1902. Also the report of the inspection of immigrants for the month of September, 1902.

Two vessels were inspected and passed and 2 bills of health were issued.

The sanitary condition of the city is about the same.

Respectfully,

W. W. KING,  
Assistant Surgeon.

The SURGEON-GENERAL.

*Inspection of immigrants at San Juan and subports during the week ended October 4, 1902.*

SAN JUAN, P. R., October 7, 1902.

SIR: I submit herewith report of alien steerage passengers arriving at this port during the week ended October 4, 1902. September 28, Spanish steamship *Manuel Calco*, from Genoa, Barcelona, Malaga, Cadiz, Las Palmas, Teneriffe, and La Palma, with 46 immigrants; Cuban steamship *Maria Herrera*, from Cuban and Dominican ports, with 5 immigrants. October 3, French steamship *Olinde Rodrigues*, from Havre, Bordeaux, St. Thomas, West Indies, with 11 immigrants. Total, 62.

Respectfully,

H. S. MATHEWSON,  
Passed Assistant Surgeon,  
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

SAN JUAN, P. R., October 7, 1902.

SIR: I submit herewith report of alien steerage passengers arriving during the week ended October 4, 1902, at the subports of Porto Rico.

*Mayaguez*.—September 28, Spanish steamship *Catalina*, from Barcelona, Palma, Valencia, Alicante, Malaga, Cadiz, Las Palmas, Teneriffe, St. Cruz de la Palma, and San Juan, P. R., with 3 immigrants. Other subports, no transactions.

Respectfully,

H. S. MATHEWSON,  
Passed Assistant Surgeon,  
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

SAN JUAN, P. R., October 13, 1902.

SIR: I herewith submit report of arrivals of alien steerage passengers arriving at this port during the week ended October 11, 1902.

*Ponce*.—October 4, steamship *Salvador*, from St. Thomas, with 15 immigrants.

*Mayaguez*.—October 5, steamship *Salvador*, from St. Thomas and Martinique, with 3 immigrants.

*San Juan*.—October 8, steamship *Caracas* from La Guaira, Puerto Cabello, and Curaçao, with 5 immigrants. Total, 23.

Respectfully,

BENSON H. SISSON,  
Acting Commissioner.

The SURGEON-GENERAL.

*Report of inspection of immigrants at San Juan, P. R., during the month of September, 1902.*

Total number of immigrants inspected, 120; number passed, 120.

H. S. MATHEWSON,  
Passed Assistant Surgeon,  
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

*Report of immigrants inspected at the subports of Porto Rico during the month of September, 1902.*

Total number of immigrants inspected, 31, at Mayaguez; number passed, 31.

H. S. MATHEWSON,  
Passed Assistant Surgeon,  
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

*Inspection of immigrants at Ponce during the week ended October 4, 1902.*

PONCE, P. R., October 6, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I submit herewith report of alien steerage passengers arriving at this port during the week ended October 4, 1902. September 30, Spanish steamship *Catalina*, from Barcelona, Valencia, Cadiz, Alicante, Canary Island, San Juan, and Mayaguez, with 6 immigrants. October 4, French steamship *Salvador*, from Fort de France and St. Thomas, with 15 immigrants. Total, 21.

Respectfully,

W. W. KING,  
Assistant Surgeon.

The SURGEON-GENERAL.

*Report of immigrants inspected at the port of Ponce, P. R., during the month of September, 1902.*

Total number of immigrants inspected, 27; number passed, 27.

W. W. KING,  
Assistant Surgeon.

The SURGEON-GENERAL.

## RUSSIA.

*Deaths from acute infectious diseases during the year 1901.*

DEPARTMENT OF STATE,  
Washington, October 11, 1902.

SIR: I have the honor to transmit herewith, for the information of the Marine-Hospital Service, a copy of the dispatch from the consul-general of the United States at St. Petersburg, Russia, with inclosed report on deaths from acute infectious diseases in Russia during the year 1901.

I have the honor to be, sir, your obedient servant,

JOHN HAY,  
Secretary.

The SECRETARY OF THE TREASURY.

[Inclosure.]
